

Quality windows for every home

 **Baufen**[®] Windows

Your investment in the future!

Reliability - We stand behind our products and due to this we offer you a full guarantee. Trust in what we do inspires us to convince you in the quality of our products.

Diversity - We have successfully proved ourselves on the market not only as a manufacturer of windows systems but also of many other products which makes us a reliable partner for you.

Tradition - We remain loyal to our heritage and show it with pride. "Made by BAUFEN" additionally highlights the quality of the wide range of products and the passion with which we create them for you.

Future-oriented - Our goal is to continuously improve the products, using the most contemporary technology. In the highly competitive market today particularly important for the window is to meet especially the requirements for environmental protection and energy efficiency. We do this and we offer for all of our systems excellent insulation indicators (U-values).

 **Baufen**[®] Windows

Quality windows for every home

Windows are the eyes of your home - outside they give personal character to the facade and inside they contribute to the aesthetics of your home.

6-camera system

Savings

Old window	Prior to 1990 ($U_w = 5.76W/m^2K$)
New window	Ultima 70 with a triple glazing ($U_w = 1.2W/m^2K$)
Surface of windows	15m ² (responsible for 66 m ² of living area)

You save: 380 BGN

We take care of you to feel good at home! With our high quality systems, complying with the energy efficiency requirements, you can enjoy the home comfort all year round while saving.

Glazing

Double glazing

24 mm glazing 4/16/4, or 28 mm 4/20/4. Perfect noise isolation, limits the loss of energy and influence of temperature changes.

Double glazing with argon gas

24 mm glazing 4/16/4, or 28 mm 4/20/4. For facades which are exposed to noise. This glazing can reduce the noise, with a very good thermal efficiency.

Triple glazing

Glazing 32 mm 4/10/4/10/4 and 36 mm 4/12/4/12/4. Maximum indicators for thermal and noise insulation for buildings with the highest requirements.

Each glazing additionally reduces the thermal losses by 60% when the inner glass is of low emission.

Colours

We offer choice of colours which meet the highest technical requirements. The dark materials are heated considerably when they are exposed to sunlight. For **BAUFEN Windows** we use special reflective decorative foils through which the thermal absorption is much lower.

Environmental friendliness

In the event of subsequent replacement of the windows we guarantee that the materials used are recycled and can be put back into production. **BAUFEN Windows** offers you only advantages which are a safe investment for your future.
